

# C/SRE 3612 Conveyor Sewing Workstation

At Cutsew, we love helping customers solve their sewing and cutting room challenges. For example, we can customize a conveyor sewing system specifically to fit your needs and specifications. Our custom-designed and custom-built workstations offer the sewing machines and sewing heads you need with conveyors up to 40' long with various belt widths available.

“We print large format graphics utilizing fabrics primarily for the media that's printed and then we sew the fabrics to fit onto large frames that are used for meetings and trade shows. And one of the functions that we do perform in sewing is silicone edge installation so that we can do a very clean looking display. The sewing table Cutsew designed with our team does that more efficiently than any other apparatus that we know of...”

**Fred Axelberd, President, Displayit**

- Electronically synchronized sewing machine to conveyor belt system
- Conveyor belts in custom lengths up to 40' long
- Customized belt widths
- Easy operation—Even inexperienced operators can run with minimal training.
- One-operator sewing
- Ideal for attaching silicone profile to edges of banners for use in aluminum frames
- Air ports hold cloth into place for faster sewing and consistent stitch quality every time.
- Can be customized for many sewing applications using large fabric panels
